

Course programs with information according to Article 4 from the Rulebook of compulsory components for the first cycle study programs (“Official Gazette of the Republic of Macedonia”, no. 25/2011 and no.154/2011)

Current number:

Appendix 3 - Courses Programs

Appendix 3.		Program of the Course for First cycle studies			
	Title of Course	Principles of Economics			
	Code	4EK100123			
	Study program	Business Economics			
	Organizer of the Study program	Faculty of Economics			
	Level (first, second or third cycle of studies)	First cycle of studies			
	Academic year/ semester	1 / I	7.	Number of ECTS	6
8.	Professor (s)	Darko Lazarov			
9.	Requirements for enrolling the course	None			
10.	The main aim of the course is to introduce students in the basic economic principles, laws, concepts and methods. Actually, the course is designed as an introduction to the study of economics. Students will be exposed to the economic way of thinking and learn about the functioning of a modern market economy. The students will learn how do firms make their business decisions depending on the economic market structure (perfect completion, oligopoly, monopoly or monopolistic competition) and based on previous production and cost analysis. In the same time, students will learn the basic macroeconomic topics regarding the national production and GDP, macroeconomic equilibrium at short and long run, inflation and unemployment, financial markets and interest rates, as well as, macroeconomic (fiscal and monetary) policies.				
11.	The early part of the course focuses on microeconomic analysis including the behavior of consumers and firms. It includes the analysis of markets for goods and services (demand and supply, function and elasticity of demand and supply) and policy choices that affect these markets. In the same time, the theory of firms will be elaborated including the question how do the firms create their business decisions based on production and cost analysis. The later part of the course moves on to macroeconomic concepts such as national production and GDP, employment, inflation and interest rates. In this part, the models that determine long-run growth and short-term fluctuations in national economies are explained. The final part of the course discusses the role of government regulation, as well as, the monetary policy and fiscal policy as main macroeconomic policies.				
12.	Methods of learning: lectures, exercises, consultations				
13.	Total amount of available time: 6 EKST x 30 hours = 180 hours				

14.	Distribution of available time: 30+30+30+30+60=180 hours (2+2+1)					
15.	Forms of teaching / learning activities		15.1	Lectures / theoretical, contact teaching, e-learning		30 hours
			15.2	Exercises (practical, laboratory, theoretical, seminars, team work)		30 hours
16.	Other forms of activities		16.1	Projects		30 hours
			16.2	Individual work		30 hours
			16.3	Home learning		60 hours
17.	Method of assessment					
	17.1	Tests / Oral Exam			70 scores	
	17.2	Individual work (presentation, projects, practical)			10 scores	
	17.3	Activity and participation			20 scores	
18.	Assessment Criteria (scores/ points)			up to 50 points	5	(five) (F)
				51 to 60 points	6	(six) (E)
				61 to 70 points	7	(seven) (D)
				71 to 80 points	8	(eight) (C)
				81 to 90 points	9	(nine) (B)
				91 to 100 points	10	(ten) (A)
19.	Signature approval and entrance to the final exam/ or transition in the next year			60% active participation at the course		
20.	Language of teaching / study			English		
21.	Methods of measuring / monitoring the quality of teaching			Standardized motor tests, observation, survey Self-evaluation

Appendix 3.		Program of the Course for First cycle studies			
	Title of Course	Principles of Finance			
	Code	4EK100223			
	Study program	Business Economics			
	Organizer of the Study program	Faculty of Economics – University “Goce Delchev” Shtip			
	Level (first, second or third cycle of studies)	First cycle of studies			
	Academic year/ semester	First / I	7.	Number of ECTS	6
8.	Professor (s)	Associate Professor Marija Gogova Samonikov			
9.	Requirements for enrolling the course	None			
10.	Aims of the course (competences): The subject program offers answers to questions related to the history of the existence of finance as a science; the reasons and justification for the existence of finance in a social system; the basics of the functioning of corporate finance; monetary finance; public finance and international finance.				
11.	Contents of the course: - finance as a science - financial system - business finance - monetary and banking operations - public finances - international finance				
12.	Methods of learning: lectures, exercises, consultations				
13.	Total amount of available time: 6 EKST x 30 hours = 180 hours				
14.	Distribution of available time: 30+30+30+30+60=180 hours (2+2+1)				

15.	Forms of teaching / learning activities		15.1	Lectures / theoretical, contact teaching, e-learning		30 hours	
			15.2	Exercises (practical, laboratory, theoretical, seminars, team work)		30 hours	
16.	Other forms of activities		16.1	Projects		30 hours	
			16.2	Individual work		30 hours	
			16.3	Home learning		60 hours	
17.	Method of assessment						
	17.1	Tests / Oral Exam			70 scores		
	17.2	Individual work (presentation, projects, practical)			10 scores		
	17.3	Activity and participation			20 scores		
18.	Assessment Criteria (scores/ points)			up to 50 points	5	(five)	(F)
				51 to 60 points	6	(six)	(E)
				61 to 70 points	7	(seven)	(D)
				71 to 80 points	8	(eight)	(C)
				81 to 90 points	9	(nine)	(B)
				91 to 100 points	10	(ten)	(A)
19.	Signature approval and entrance to the final exam/ or transition in the next year			60% active participation at the course			
20.	Language of teaching / study			English			
21.	Methods of measuring / monitoring the quality of teaching			Standardized motor tests, observation, survey Self-evaluation

Appendix 3.		Program of the Course for First cycle studies				
	Title of Course		Financial Accounting			
	Code		Financial Accounting			
	Study program		Business Economy			
	Organizer of the Study program		Faculty if Economics, UGD Shtip			
	Level (first, second or third cycle of studies)		First cycle of studies			
	Academic year/ semester		First / first	7.	Number of ECTS	6
8.	Professor (s)		Full Professor Olivera Gjorgieva-Trajkovska			
9.	Requirements for enrolling the course		None			

10.	Aims of the course (competences): The aim of the subject discipline is to gain knowledge about the basic principles of accounting and the way of their implementation; understand the potential users of accounting information and the basic modalities in external and internal financial reporting; become familiar with the structure and method of preparation of the basic financial reports - the balance sheet, the income statement, the cash flow statement and the statement in changes of capital, as well as the information that each of them offers to potential users (stakeholders); master the basic techniques of accounting recording - recording assets, liabilities and capital; acquire basic knowledge about the types of costs, the ways of their allocation and accounting recording; get acquainted with the accounting recording of income and expenses, as components of the income statement and determination and distribution of the achieved financial result. After completing the course, students should be able to: apply specific national and international accounting regulations in the process of preparing and presenting basic financial statements for general purpose; identify, properly record and disclose transactions related to the assets, liabilities, capital, income and expenses of the business entity; prepare a statement of cash flows, based on operational, financial and investment activities; prepare a statement of capital changes; determining the achieved financial result and its distribution; carry out the necessary pre-closing and closing evidence and closing of the accounts, in order to prepare the basic financial statements.
11.	Contents of the course: • Introduction to accounting; Historical development of accounting; Role, goals and tasks of accounting • Characteristics of accounting information; Users of accounting information • International standards for financial reporting • Accounting and ethics • Accounting documents; Accounting, bookkeeping, movement and storage of accounting documentation • Basic assumptions for preparation of financial statements • Structure of the Balance sheet • Financial indicators from the Balance sheet • Structure of the Income statement • Financial indicators from the Income statement • Statement of cash flows and methods for its preparation and presentation • Statement of changes in shareholders capital • Notes to the financial statements • Accounts as an instrument of the accounting procedure • Non-current (permanent) assets and evidence of their acquisition

	• Evidence of current assets • Entries related to finished products • Entries related to trade goods • Evidence of obligations • Regular and extraordinary incomes and expenses • Determination and distribution of financial results • Capital evidence • Treatment of accounting errors			
12.	Methods of learning: lectures, exercises, consultations			
13.	Total amount of available time: 6 EKST x 30 hours = 180 hours			
14.	Distribution of available time: 30+30+30+30+60=180 hours (2+2+1)			
15.	Forms of teaching / learning activities	15.1	Lectures / theoretical, contact teaching, e-learning	30 hours
		15.2	Exercises (practical, laboratory, theoretical, seminars, team work)	30 hours
16.	Other forms of activities	16.1	Projects	30 hours
		16.2	Individual work	30 hours
		16.3	Home learning	60 hours
17.	Method of assessment			
	17.1	Tests / Oral Exam		70 scores
	17.2	Individual work (presentation, projects, practical)		10 scores
	17.3	Activity and participation		20 scores
18.	Assessment Criteria (scores/ points)	up to 50 points	5	(five) (F)
		51 to 60 points	6	(six) (E)
		61 to 70 points	7	(seven) (D)
		71 to 80 points	8	(eight) (C)
		81 to 90 points	9	(nine) (B)

		91 to 100 points	10	(ten)	(A)	
19.	Signature approval and entrance to the final exam/ or transition in the next year		60% active participation at the course			
20.	Language of teaching / study		English			
21.	Methods of measuring / monitoring the quality of teaching		Standardized motor tests, observation, survey Self-evaluation

Annex 3.		Program of the course for First cycle studies	
	Title of Course	Business mathematics	
	Code	4EK100423	
	Study program	Business Economics	
	Organizer of the Study program	Goce Delchev University – Stip Faculty of Economics	
	Level (first, second or third	First cycle	

	cycle of studies)				
	Academic year/ semester	First year / First semester	7.	Number of ECTS	6
	Professor (s)	prof. Limonka Koceva Lazarova			
	Requirements for enrolling the course	None			
	Aims of the course (competences): The aim of this course is to enable students to acquire knowledge in mathematics and its application in economy.				
	Contents of the course (per 15 weeks per semester): 1. Real sequence: Definition of real sequence, Convergence, and limit value, Bounded and monotonic sequence, Null-sequences, and sequences that grow indefinitely in absolute value, The number e, Some special sequences, Arithmetic, and geometric progression. 2. Real function of one real variable: Basic concepts, Examples of functions and some classes of functions, Limit values and continuity, Application of elementary functions in the economy (profit, income, costs, profitability point). 3. Derivatives and rules for their calculation, Lopital's rule, Application of derivatives in extremal problems, Analysis and drawing a graph of a function. 4. Economic functions: Supply function, Demand function, Equilibrium in the market, Elasticity of supply and demand, Function of total income, Cost function, Profit function. 5. Integral calculation. Applications of integrals in economy. 6. Proportions. Percent, per thousand. Chain account. 7. Simple interest. 8.Compound interest. 9. Discounting 10. Annuities and loans.				
	Methods of learning: Lectures, theoretical and practical exercises, e-learning, teamwork, consultations.				
	Total amount of available time: 6 ECTS x 30 hours = 180 hours				
	Distribution of available time: 30 + 30 + 30 + 30 + 60 = 180 hours (2 + 2 +1)				

	Forms of teaching / learning activities		15.1	Lectures / theoretical - contact teaching, e-teaching (15 weeks x 2 hours = 30 hours)		30 hours	
			15.2	Theoretical and practical exercises, e-exams, preparation of independent seminar work (15 weeks x 1 hours = 15 hours)		30 hours	
	Other forms of activities		16.1	Projects		30 hours	
			16.2	Individual work		30 hours	
			16.3	Home learning		60 hours	
	Method of assessment						
	17.1	Tests / Oral Exam		70 scores			
	17.2	Individual work (presentation, practical)		10 scores			
	17.3	Activity and participation		20 scores			
	Assessment Criteria (scores/ points)			up to 50 points	5	(five)	(F)
				51 to 60 points	6	(six)	(E)
				61 to 70 points	7	(seven)	(D)
				71 to 80 points	8	(eight)	(C)
				81 to 90 points	9	(nine)	(B)
				91 to 100 points	10	(ten)	(A)
	Signature approval and entrance to the final exam/ or transition in the next year			60% active participation at the course			
	Language of teaching / study			English			
	Methods of measuring / monitoring the quality of teaching			Standardized motor tests, observation, survey Self-evaluation

Appendix 3.		Program of the Course for First cycle studies				
	Title of Course	Macedonian language 1				
	Code	4FF100723				
	Study program	Business Economics				
	Organizer of the Study program	Faculty of Economics, UGD Shtip				
	Level (first, second or third cycle of studies)	First cycle				
	Academic year/ semester	First year / First semester	7.	Number of ECTS	4	
8.	Professor (s)	Ana Vitanova-Ringaceva				
9.	Requirements for enrolling the course	None				
10.	Aims of the course (competences): At the end of the course the student is expected to: understand and use familiar everyday expressions and very basic phrases aimed at the satisfaction of needs of a concrete type; introduce him/herself and others and can ask and answer questions about personal details such as where they live, people they know and things they have; interact in a simple way provided the other person talks slowly and clearly and is prepared to help; identify himself and answer questions concerning, for example, his nationality, his age, his place of residence, his date of birth, his school and possibly, to ask himself questions of this type to somebody; recognize names, the most common words or expressions in simple situations of the everyday life: signs,					

	handwritten indications doubled by icons, prices, schedules; spot and understand quantified data, proper nouns and other very simple information in a short text; identify globally (in their aspect, their typography, their localization) the function of certain common texts of the daily environment or the school environment; write a very simple message concerning the activities of the daily life containing some personal details.			
11.	Contents of the course (per 15 weeks per semester): Vocabulary: Basic vocabulary including: Alphabet, international words, names, greetings, countries and cities, objects, professions, countries and languages, family, food and drinks, meals, days, months, clothes, colors, parts of the head and the body, free time, abilities; Grammar: Basic grammar: personal pronouns and the auxiliary verb “cym“ – “to be” (affirmative, negative and interrogative form), present tense (a-, e- and i-verb groups), nouns (gender, number and determination), adjectives and possessive pronouns-adjectives. All communicative skills are equally included in the course including basic communication: spelling names, exchanging phones, talking about counties and nationalities, greetings and introductions, describing physical appearances and character, talking about abilities, talking about daily routines, telling time, talking about houses and locations, talking about food preferences and preparing food, etc. The students will acquire basic knowledge of Macedonian culture.			
12.	Methods of learning: Interactive method: group work, reports, homework, seminar papers, discussion, debate, cooperative studying techniques, individual tasks, simulation of extra-curricular educational activities, individual studying.			
13.	Total amount of available time: 120			
14.	Distribution of available time: 2+1+1			
15.	Forms of teaching / learning activities	15.1	Lectures / theoretical, contact teaching, e-learning	30 hours
		15.2	Exercises (practical, laboratory, theoretical, seminars, team work)	ours
16.	Other forms of activities	16.1	Projects	15 hours
		16.2	Individual work	30 hours
		16.3	Home learning	ours
17.	Method of assessment			
	17.1	Tests / Oral Exam		70 scores
	17.2	Individual work (presentation,		10 scores

		projects, practical)				
	17.3	Activity and participation	20 scores			
18.	Assessment Criteria (scores/ points)		up to 50 points	5	(five)	(F)
			51 to 60 points	6	(six)	(E)
			61 to 70 points	7	(seven)	(D)
			71 to 80 points	8	(eight)	(C)
			81 to 90 points	9	(nine)	(B)
			91 to 100 points	10	(ten)	(A)
19.	Signature approval and entrance to the final exam/ or transition in the next year		60% active participation at the course			
20.	Language of teaching / study		English			
21.	Methods of measuring / monitoring the quality of teaching		Standardized motor tests, observation, survey Self-evaluation

Appendix 3.		Program of the Course for First cycle studies	
	Title of Course	German language level A1.1	
	Code	4FF100223	

	Study program	Business Economics			
	Organizer of the Study program	Faculty of Economics, UGD Shtip			
	Level (first, second or third cycle of studies)	First cycle			
	Academic year/ semester	First year / First semester	7.	Number of ECTS	4
8.	Professor (s)	Lecturer MA Marica Tasevska			
9.	Requirements for enrolling the course	None			
10.	Aims of the course (competences): Students to be able to conduct short dialogues when meeting, greeting, to express opinions on everyday topics, to find an unknown city, to communicate with people from German-speaking countries, to shop in Germany, to make recommendations, to describe and express specific opinions, to get acquainted with the culture and civilization in the German-speaking countries, etc.				
11.	Contents of the course (per 15 weeks per semester): Grammar: verbs and conjugation of verbs (haben, sein, kommen, sprechen, fahren, schlafen, sehen ...) question words (wer, wo, woher, wie,) personal pronouns (accusative and dative), possessive pronouns (nominative and accusative), definite / indefinite article, separable verbs, adverbs in time (accusative and dative), question sentences, modal verbs (mögen, können, wollen, dürfen, sollen, müssen), perfect (past tense), imperative (ordering, adverbs of place, modality (könnten, würden + infinitiv), comparative and conjugative adjectives (viel, gern, gut), verbs with dative, conjunctions for independent sentences (und, oder, aber, de nn), ordinal numbers. Vocabulary: words from the field: greeting, presentation, eating and drinking, weight measures, furniture, household appliances, numbers, colors, activities and leisure, weather, professions, human body parts, diagnoses and recommendations, landmarks of the city, transportation, fashion and clothing, more important holidays in the German-speaking countries, etc. Speaking: dialogues when meeting, first meeting, description of person, dialogues in the market, restaurant, description of an apartment or particular room, description of activities we undertake in our free time, description of a profession, description of a city that you visited and country, scheduling, rescheduling or cancellation of an appointment, description of a particular location, answering machine message, dialogues in shopping center, fashion magazine image description, sharing specialty opinions, greetings and phrases to celebrate holidays or festivities in German-speaking countries.				
12.	Methods of learning: Interactive method: group work, reports, homework, seminar papers, discussion, debate, cooperative studying techniques, individual tasks, simulation of extra-curricular educational activities, individual studying.				
13.	Total amount of available time: 120				

14.	Distribution of available time: 2+1+1						
15.	Forms of teaching / learning activities		15.1	Lectures / theoretical, contact teaching, e-learning		30 hours	
			15.2	Exercises (practical, laboratory, theoretical, seminars, team work)		hours	
16.	Other forms of activities		16.1	Projects		15 hours	
			16.2	Individual work		30 hours	
			16.3	Home learning		hours	
17.	Method of assessment						
	17.1	Tests / Oral Exam			70 scores		
	17.2	Individual work (presentation, projects, practical)			10 scores		
	17.3	Activity and participation			scores		
18.	Assessment Criteria (scores/ points)			up to 50 points	5	(five)	(F)
				51 to 60 points	6	(six)	(E)
				61 to 70 points	7	(seven)	(D)
				71 to 80 points	8	(eight)	(C)
				81 to 90 points	9	(nine)	(B)
				91 to 100 points	10	(ten)	(A)

9.	Requirements for enrolling the course	Principles of Economics				
10.	The fundamental goal of Intermediate Macroeconomics course is to provide an integrated view of macroeconomics, and to make close contact with current macroeconomic events. Actually, macroeconomics studies the aggregate behaviour of the economy. This course provides an introduction to the economic analysis of key macroeconomic variables such as output, employment, inflation, interest rates and exchange rates. The important elements of the course include measurement of macroeconomic variables, the development of models and theories to explain the behaviour of macroeconomic variables, the use of empirical evidence in evaluating different models, and the role of government policy in seeking to influence macroeconomic outcomes. The course will provide students with a framework for understanding the workings of the whole economy and the various interactions among households, business and governments.					
11.	The intermediate macroeconomic course includes theories and concepts such as national production and GDP, unemployment and inflation, financial markets and interest rates, international economics and exchange rates. The course will elaborate the economic cycle models that determine the short-term fluctuations in national economies. The final part of the course discusses about the economic growth and productivity, as well as, the monetary policy and fiscal policy as main macroeconomic policies.

	the course	
10.	Aims of the course (competences): The purpose of teaching the subject is to understand the contemporary marketing concept in the operation of enterprises and organizations, which is considered to be the guiding philosophy in creating the business strategy as a direction of business movement. With the teaching content, knowledge about how marketing helps in building a competitive advantage in market conditions by maximizing consumer satisfaction, while enabling the optimization of production and the maximization of profit, will be acquired. In that sense it is also the needed to get broader knowledge of marketing, because today, and in future, in the centre of interest of every enterprise should be the consumer and his needs, with a goal to be satisfied. This can be achieved by creating products that are in demand on the market, the appropriate level of prices at which they are offered, easy availability through available distribution channels and two-way communication with consumers through promotional activities aimed at informing and persuading them. The subject also includes lessons about the marketing environment, market research, study of the different types of consumers and consumer behaviour, the elements of the marketing mix - the product / service, price, distribution, and promotion, as well as marketing strategy and management.	
11.	Contents of the course: 1. Defining and introducing the marketing concept and the marketing process; 2. Marketing environment; 3. Marketing in a turbulent environment; 4. Understanding the market and consumers; 5. Consumer versus business markets; 6. Marketing information system; 7. Basic marketing strategies; 8. Marketing mix; 9. Product strategies and branding; 10. New product development and life cycle; 11. Pricing of products; 12. Marketing distribution and online marketing;	

	13. Retail and wholesale; 14. Promotion and promotional mix; 15. Marketing planning; 16. Application of the marketing concept in the operation of enterprises through understanding the basics of marketing management; 17. Global marketing; 18. Marketing ethics and social responsibility.

Appendix 3.	Program of the Course for First cycle studies	
	Title of Course	International Finance
	Code	4EK101323
	Study program	Business Economy
	Organizer of the Study	University “Goce Delchev”, Shtip / Faculty of Economics

	program				
	Level (first, second or third cycle of studies)	First cycle			
	Academic year/ semester	3(second) / 5(fifth) semester	7.	Number of ECTS	6
8.	Professor (s)	Associate Professore			
9.	Requirements for enrolling the course	None			
10.	Aims of the course (competences): In conditions of increasing economic integration and globalization, the international finance is becoming an increasingly popular concept, which refers to managing with finance in the international business environment. International financial activities enable organizations to conduct business and conclude international deals with business partners who are located all over the world. Therefore, studying this discipline becomes more than needed. Understanding international finance will help students and future financial managers to determine how international events may affect their business, as well as what steps should be taken in order to take advantage of the positive effects of these events, and at the same time how to protect the business from those events that happen at the international level, but which can have negative effects on the company's operations. Furthermore, this course will point out on which problems and challenges are faced international companies. In addition to that, we will analyze the impact of companies that operate locally, but have exports or imports to or from other countries, as well as companies that operate only locally, and compete with companies that act globally. This course will help students to gain a solid foundation for understanding the international finance, which will benefit them in further education, as well as in the career, in terms of global financial environment				
11.	Contents of the course: Introduction to International Finance: History, trends and international institutions Economic globalization International corporations Exchange markets (meaning, functions) Exchange rate (depreciation, appreciation and their influence on import and export, factors that affected				

	exchange rates) Financial derivatives Types of exchange rate regimes International Monetary system Optimal currency area Balance of payment International capital market International trade Foreign direct investment

10.	Purposes of the curriculum (competencies): The purpose of this course is to enable students to learn the basic principles of international trade law, relevant international trade legislation, the basic concepts, institutes and categories of international trade law. The course is designed to enable students to acquire systemic knowledge in order to upgrade their knowledge of trade law. The focus of the program is on relevant legal sources in the field of international trade law. Upon completion of this course, students will be able to give advice for conclusion and implementation of international trade agreements, provide international trade transaction consulting, work in international trade organizations, the business sector and public sector about international trade issues.					
11.	Content of the course program: -The historical development of international trade law, its role and significance in world trade - Evolution of international trade law through the harmonization and unification of relevant legislation -The relation of international trade law with others international legal branches -International commercial law as part of other branches of law and its relation to other treaties -Principles -Companies in international trade law -the origin of the companies -The concept of international corporation					

	-The success of the harmonization of European company law -Overview of the company law directives - First council directive – disclosure and the validity of obligations entered into by, and the nullity of, companies with limited liability (68/151/EEC) - Third council directive – domestic mergers of public limited liability companies (78/855/EEC) -Eighth council directive - qualifications of persons responsible for carrying out the statutory audits of accounting documents (84/253/EEC) -Tenth directive - cross-border mergers of limited liability companies (2005/56/ec) -Lex Mercatoria and its role in the process of unification and harmonization of international trade agreements -International legal sources - Vienna Convention on the International Sale of Goods (CISG, 1980) -The Principles of European Contract Law (Lando Principles. Principles of European Contract Law, Part 1,2 3). -Draft Common Framework of Reference (Draft Common Framework of Reference, Study Group on European Civil Code and Research Group on EC Private Law (Acquis Group)) - Principles of International Trade Contracts (UNIDROIT principles of international commercial contracts) - Foundation, tasks, methods and composition of UNCITRAL commission - (ICC) International Contracting Standards (ICC Standards, INCOTERMS International Chamber of Commerce Rules) -ICC Model contracts, ICC Model Clauses, ICC Rules, COMBITERMS, Institute Cargo Clauses) -International carriage of goods in whole traffic branches - Contract for transport of goods in the international road traffic -Convention on the Carriage of Goods by Road (CMR) - (Geneva, 19 May 1956) - Contract for transport of goods in the international railway traffic -Convention on the Carriage of Goods by International Rail Transport (Convention of International Carriage by Rail of 9 May 1980) -Convention on the Carriage of Goods by Sea, Hamburg Rules, 1978; - Agreement on maritime and other modes of transport in international law - Rotational rules for the carriage of goods in full in part by sea, 2008, Rotterdam Rules -United Nations Convention on Contracts for the International Carriage of Goods Wholly or Partly by Sea)
--	---

	International commercial agency -Generally on international commercial agency -Authorization -Legal nature of commercial agency contract -General characteristics of the commercial agency contract -International legal sources for international commercial agency -Council Directive 86/653/EEC of 18 December 1986 on the coordination of the laws of the Member States relating to self-employed commercial agents -Rights and obligations according to Council Directive 86/653/EEC -Remuneration according to Council Directive 86/653/EEC -Conclusion and termination of the agency contract International Commission business -Notion and general characteristics of commission business contract -Obligation of commission agent -Obligation of client -Right of lien -The concept of del credere liability -Relation with third parties -Termination of the commission business contract Insurance -The notion and types of insurance -The degree, role and significance of harmonization and unification process of the insurance as a commercial activity and the insurance contract International legal sources -Directive 2009/138/EC of the European Parliament and of the Council of 25 November 2009 on the taking-up and pursuit of the business of Insurance and Reinsurance (Solvency II) - Impact of bankruptcy and bankruptcy procedure on the insurance contract - Liability of contracting parties for breach of insurance contract obligations -property insurance -Limitation of the insured risk
--	---

-Over insurance and a contract with several insurers

-Transfer of contract and the payment of insurance compensation to another

- Termination of the insurance contract

- Transfer of insured person's rights against the liable person to the insurer (subrogation)

International Warehousing agreement

-The notion and characteristics of contract of warehousing

- The rights and obligations of the warehouse keeper

- The liability of warehouse keeper

-Warehouse warrant

-The concept of 3PL and 4PL agreement

-Termination of the contract of warehousing

International Factoring

-The notion and characteristics of factoring contract

- The role of the factoring as a trade activity in economy

-Types of factoring contracts and their differentiating from forfeiting contract, cession and assumption of debt

-Unidroit convention on international factoring

-Sphere of application and general provisions

-Rights and duties of the parties under UNIDROIT convention on international factoring

- Subsequent assignments under UNIDROIT convention on international factoring

-Termination of the factoring contract

Licensing agreement

- General for licensing

-The notion of the licensing agreement

-Rights and obligation of the licensor

-Rights and obligation of the licensee

-Sublicense

-International legal sources

-Commission Regulation (EU) No 316/2014 of 21 March 2014 on the application of Article 101(3) of the Treaty on the Functioning of the European Union to categories of technology transfer agreements

	- Termination of the licensing agreement -Comparison of the license agreement with franchising agreement -International contract of control of merchandise and services -General for control of merchandise and services -The notion of the contract of merchandise and services -The rights and obligations of the contract parties -The specifics of the obligations of the controller -Termination of the contract Franchise -The notion of the franchise agreement -The role and significance of franchising -Rights and obligations of the contracting parties -Termination of the agreement International Letter of credit -The notion of the letter of credit - UCP 600 (2007 Revision) -The rights and obligations of the contracting parties -Types of letters of credit - The comparison of the letter of credit with other bank documents -Termination of the contract The role and significance of the World trade organization			
12.	Learning methods: The classes are carried out on the base of the interactive concept of learning and teaching (pre-active phase, Interactive phase and post-active phase). The whole concept of teaching is organized on the way that enables student's to be active participants at the class, but no to be passive listeners. Lectures are taught by using comparative, historical, analytical, analytical descriptive methods etc. During the exercises, the case studies concept of learning is included. For enrichment of the interactivity of the students, the classes are also organized as workshops, simulation of famous court cases in the area of international trade law, trainings for writing essays etc.			
13.	Total amount of available time:	4 EKST x 30 hours = 120 hours		
14.	Distribution of available time:	30+15+15+30+30 = 120 hours (2+1+1)		
15.	Forms of teaching / learning	15.1.	lectures / theoretical - contact	30 hours

	activities		teaching, e-teaching	
		15.2.	theoretical and practical exercises, e-exams, preparation of independent seminar work	15 hours
16.	Other activities	16.1.	Project tasks	15 hours
		16.2.	Individual tasks	30 hours
		16.3.	Home learning	30 hours
17.	Method of assessment			
	17.1.	Tests / oral exams		70 points
	17.2.	Seminars (paper / project - presentation: written and/or oral)		10 points
	17.3.	Activity and participation		20 points
18.	Assessment Criteria (points / score)	up 50 points		5 (five) (F)
		51 to 60 points		6 (six) (E)
		61 to 70 points		7 (seven) (D)
		71 to 80 points		8 (eight) (C)
		81 to 90 points		9 (nine) (B)
		91 to 100 points		10 (ten) (A)
19.	Signature requirement and passing the final exam			
20.	Language of teaching / study		Macedonian language	
21.	Method of monitoring the quality of teaching		Self-evaluation	

Appendix 3.		Program of the Course for First cycle studies	
	Title of Course	MANAGEMENT OF HUMAN RESOURCES	
	Code	4EK101623	

	Study program	BUSINESS ECONOMICS			
	Organizer of the Study program	Faculty of Economics			
	Level (first, second or third cycle of studies)	First cycle			
	Academic year/ semester	3 semester, second year	7.	Number of ECTS	4
8.	Professor (s)	Full professor Elenica Sofijanova			
9.	Requirements for enrolling the course	None /			
10.	Aims of the course (competences): The teaching content of the subject has been adjusted so that it will acquaint students with insights into the importance of human resources in organizations, the types of managers, their skills, necessary competencies and abilities, the managerial functions of planning, job analysis, recruitment, selection will be elucidated and introduced. , training and development.				
11.	Contents of the course: 1. Basics of management and Introduction to the development of human resources; 2. Job Analysis and Human Resources Planning; 3. Recruitment of potential candidates and Selection of candidates; 4. Employee Training and Employee Development 5. Employee Performance Evaluation, Earning Systems; 6. Labor relations and collective bargaining and Leaving the organization; 7. Knowledge (understanding) of people, Interaction field: individual group-organization; 8. Conflicts and conflict resolution approaches; 9. Communication as a factor in leadership; 10. Motivating, Stress and understanding stress 11. Mobbing; 12. Self-development management, SWOT analysis.				
12.	Methods of learning: lectures, exercises, consultations				
13.	Total amount of available time: 4 EKST x 30 hours = 120 hours				
14.	Distribution of available time: 30+15+15+30+30=120 hours (2+1+1)				
15.	Forms of teaching / learning activities	15.1	Lectures / theoretical, contact teaching, e-learning		30 hours
		15.2	Exercises (practical, laboratory, theoretical, seminars, team work)		15 hours
16.	Other forms of activities	16.1	Projects		15 hours
		16.2	Individual work		30 hours
		16.3	Home learning		30 hours
17.	Method of				

	assessment						
	17.1	Tests / Oral Exam		70 scores			
	17.2	Individual work (presentation, projects, practical)		10 scores			
	17.3	Activity and participation		20 scores			
18.	Assessment Criteria (scores/ points)			up to 50 points	5	(five)	(F)
				51 to 60 points	6	(six)	(E)
				61 to 70 points	7	(seven)	(D)
				71 to 80 points	8	(eight)	(C)
				81 to 90 points	9	(nine)	(B)
				91 to 100 points	10	(ten)	(A)
19.	Signature approval and entrance to the final exam/ or transition in the next year			60% active participation at the course			
20.	Language of teaching / study			English			
21.	Methods of measuring / monitoring the quality of teaching			Standardized motor tests, observation, survey Self-evaluation

Appendix 3.		Program of the Course for First cycle studies				
	Title of Course	Fundamentals of computer programming				
	Code	2FI100221				
	Study program	Computer Engineering and Technologies				
	Organizer of the Study program	Goce Delchev University – Stip Faculty of computer science				
	Level (first, second or third cycle of studies)	First cycle				
	Academic year/ semester	1/1	7.	Number of ECTS	4	
	Professor (s)	Prof. Vlado Gicev				
	Requirements for enrolling the course	None				
	Aims of the course (competences): Gain theoretical and practical knowledge in the field of structural programming by studying the C++ programming language. Acquiring competencies for solving problems, developing algorithms and their implementation in a programming language.					
	Contents of the course (per 15 weeks per semester): Introduction in computation. What is computer programming? Data types in programming languages. Instructions for dealing and formatting input and output. Interactive and noninteractive I-O. Programming					

	structures selection, loop, recursion. Functions and function types. User defined data types. Structural vs simple data types. Records. Arrays. Multidimensional arrays.			
	Methods of learning: lectures, excercises, labs. Team project: Developing C++ program on specific practical problem.			
	Total amount of available time: 4 EKST x 30 hours = 120 hours			
	Distribution of available time: 30+15+15+30+30=120 hours (2+1+1)			
	Forms of teaching / learning activities	15.1	Lectures / theoretical, contact teaching, e-learning	30 hours
		15.2	Exercises (practical, laboratory, theoretical, seminars, teamwork)	15 hours
	Other forms of activities	16.1	Projects	15 hours
		16.2	Individual work	30 hours
		16.3	Home learning	30 hours
	Method of assessment			
	17.1	Tests / Oral Exam	70 scores	
	17.2	Individual work (presentation, projects, practical)	10 scores	
	17.3	Activity and participation	20 scores	
	Assessment Criteria (scores/ points)		up to 50 points	5 (five) (F)
			51 to 60 points	6 (six) (E)
			61 to 70 points	7 (seven) (D)
			71 to 80 points	8 (eight) (C)
			81 to 90 points	9 (nine) (B)
			91 to 100 points	10 (ten) (A)
	Signature approval and entrance to the final exam/ or transition in the next year		Gaining at least 42 out of 70 points from activities during the semester from which: 40 points from midterm exams, 10 points from project and 20 points from presence on lectures and discussions.	
	Language of teaching / study		English	
	Methods of measuring / monitoring the quality		Self evaluation

		Fourth semester			
8.	Professor (s)	Assoc. Prof. Ilija Gruevski			
9.	Requirements for enrolling the course	None			
10.	Aims of the course (competences): The purpose of the program course in Financial Management is to enable participants to understand the financial decision-making process and to interpret the impact that financial decisions will have on value creation. The course, therefore, introduces to students the three major decision-making areas in financial management: the investment, financing, and asset management decisions. Dividend policy is another important area explaining how distribution of earnings affects valuation and shareholder's wealth. In this underlying course, financial management, including its valuation techniques are explored, in an easy-to-understand, user-friendly manner. Although the design of the program is introductory in essence, it can be used as a reference tool as well. For example, participants in management development programs, candidates preparing for various professional certifications, finance and accounting practitioners will find it useful as well. And, because of the extensive use of different media and communication tools, the course is ideal for web-based training and distance learning.				
11.	Contents of the course: Introduction to Financial Management; Valuation (Time Value of Money); Tools of Financial Analysis and Planning (Financial Statement Analysis, Financial Analysis, Cash-Flow Analysis, and Financial Planning); Working Capital Management (Cash and Marketable Securities Management, Accounts Receivable and Inventory Management, Short-Term Financing); Investment in Capital Assets (Capital Budgeting Techniques); Intermediate and Long-Term Financing (The Capital Market, Long-Term Debt, Preferred Stock, Common Stock, Leases); The Cost of Capital, Capital Structure, and Dividend Policy; Special Areas of Financial Management (Convertibles, Exchangeables, Options, and Warrants);				
12.	Methods of learning: lectures, exercises, consultations				
13.	Total amount of available time: 6 EKST x 30 hours = 180 hours

	Study program		Business Economy			
	Organizer of the Study program		University “Goce Delchev”, Shtip / Faculty of Economics			
	Level (first, second or third cycle of studies)		First cycle			
	Academic year/ semester		2(second) / 4(fourth) semester	7.	Number of ECTS	4
8.	Professor (s)		Associate proffesor			

9.	Requirements for enrolling the course	None		
10.	Aims of the course (competences): The aim of the study program is to identify, assess and control the events that can be a "threat" for the capital and earnings of a company. First, we will define and explain the different types of risks that can be faced by financial and non-financial companies and then we will analyze and explain available techniques that companies may use to eliminate or reduce the consequences, which different risks can cause. Furthermore, we will see how diversification can be used to reduce financial risks and how the concept of negative asset correlation is key to protecting and dealing with different kinds of risks. Through the study of this subject, students will see the meaning of financial statements, as an important source for assessing exposure to the enterprise of risks. After studying this subject discipline, students will be able to perform quantitative risk measurement, whereby they will be able to determine the probability of occurrence of an unfavorable event and its potential impact on the company.			
11.	Contents of the course: Risks (meaning, types) Managing liquidity risk Managing credit risk Managing interest rate risk Managing exchange rate risk Managing price risk Managing share risk Managing operational risks Quantitative methods of identifying risks			
12.	Methods of learning: lectures, exercises, consultations			
13.	Total amount of available time: 4 EKST x 30 hours = 120 hours

Appendix 3.		Program of the Course for First cycle studies				
	Title of Course	Supply chain management and global logistics				
	Code	4EK102123				
	Study program	Business Economics				
	Organizer of the Study program	Faculty of Economics				
	Level (first, second or third cycle of studies)	First cycle of studies				
	Academic year/ semester	IV	7.	Number of ECTS	4	
8.	Professor (s)	Prof.d-r Riste Temjanovski				
9.	Requirements for enrolling the course	None				
10.	Aims of the course (competences): In modern economic science, the study of supply chain management issues is a reality and an inevitability considering the mass and use of transport in everyday life, as a kind of link in the process of production, exchange of goods, services and capital in the economies of our country or in individual countries. The basic postulate of the course is for students to become familiar with modern models, techniques and regulations in the domain of global supply chains and international trade. Modern economic science pays special attention to the study of the international transport and logistics sector, as a kind of link in the process of foreign trade operations, that is, the exchange of goods, services and capital as a kind of competition between countries in the world. Without a well-developed transportation, logistics system and supply chain management, all the benefits brought by the economic policy of a country cannot be optimized. Only a planned, structured and organized supply chain can provide better logistics efficiency, reduce operating costs, as well as promote the quality of services, and thus greater competitiveness in global markets. The improvement of the					

	supply systems enables the strengthening of the foreign trade sector. And a well-managed logistics system can significantly increase and strengthen the competitiveness of public enterprises and private companies that deal with these service activities.
11.	Content of the subject program: The program content of the subject Global supply chain and international trade includes modern approaches in the process of managing the flow of goods, services, finance, knowledge and the organizations that carry out such activities. Considering that the demand for goods and services in the global supply chain is growing daily, expert knowledge and modern practices are necessary that can successfully manage operations at the international level, so that products and services can reach the satisfaction of all consumers at national, regional and global markets. Delving into topics such as procurement, transportation, supply and demand estimation and forecasting, operations planning, negotiations, and warehousing, students will learn how to implement company strategy, improve competitive advantage, and achieve customer satisfaction by aim to expand businesses internationally. The focus of the subject program will be the following thematic contents: - Concept and meaning of Supply Chain Management - Logistics information systems - Contemporary trends in logistics - Modern logistics services - Essence and meaning of logistics and logistics management - Marketing logistics - An integral approach to managing marketing logistics - Distribution channels - The influence and connection of the system of international forwarding and the transport and foreign trade system - Foreign trade and supply chain management - Instruments of foreign trade policy - Commodity regimes - Export subsidies - Customs - Customs documents - Future trends in the development of transport models and intermodality policy - Integral, combined and multimodal transport

	- Use of modern means for rationalization and manipulation during the transportation of goods - Basic documents in international transport - FIATA documents - Transport clauses - Incoterms (international trade terms) - Application and knowledge of commercial clauses by the forwarder

Appendix 3.		Program of the Course for First cycle studies				
	Title of Course		Digital Economy			
	Code		4EK102423			
	Study program		Business Economics			
	Organizer of the Study program		Faculty of Economics			
	Level (first, second or third cycle of studies)		First cycle of studies			
	Academic year/ semester		VI	7.	Number of ECTS	6

8.	Professor (s)	Prof.d-r Riste Temjanovski
9.	Requirements for enrolling the course	None
10.	Aims of the course (competences): The main goal of the course is to provide opportunities for understanding and mastering the theoretical and practical knowledge in the field of the digital economy. Today, the world economy is facing unprecedented changes at the speed of light. Information technology has caused a seismic shift in all processes of human activities: life habits, way of learning, work, entertainment, sports, politics and thus changed the entire landscape of civilizational achievements. The world economy today is characterized by the transformation of business and the emergence of a new wave of changes in wealth creation, especially in emerging economies. It is rightly considered that the world is entering a new era, a new type of economy - digital economy, including globalization that modifies our relations in time, space and environment.	
11.	Contents of the course: In modern economic science, the study of the digital economy becomes a necessity and imperative in modern work. The goal of the program is to familiarize them with the needs, models, application and protection of digital electronic work in a clear, accessible and acceptable way. The digital economy aims to expand the competencies of an organizational unit in the development of innovative information and communication technologies within the organization itself and outside it, through full interactivity with its partners and clients. This process should not be considered only as simply incorporating modern technological advances to make these changes within the organizational unit itself. In order to successfully enable the management of the digital business platform, knowledge and a wide transformation of scientific values in the world of the electronic economy are necessary. The transformation itself is also due to advanced models in global value chains, the flow of enormous amounts of information, and the facilitation of electronic commerce regulation and practice. Within the new digital business world, the prospect of e-commerce seems to be the greatest. The Internet and the Web are just two essential factors in a long list of technologies that have greatly changed the world's commerce. Each of these technologies has prompted the creation of new business models and strategies designed to capture commercial advantage and profit from the technology. They are also accompanied by explosive start-up growth, characterized by the emergence of thousands of start-up companies. The subject program includes the following thematic units: Concept of the digital economy, Internet technology and the new challenges of the business world, Globalization, information technology and the digital economy, Technological development as a generator of social changes, Internet technology and the challenges of e-business, The digital economy and business information systems, Types of information systems, Man as an information system, Information systems in the organization, Business information systems and electronic data exchange,	

	System design (System thinking and system approach), System analysis, Information (Concepts for defining information, Semantic rules, information transfer, Information quality), The information dimension in the management process, Optimal management, Economics of information systems, Elements of the strategy for the construction and development of information systems, Designing new information systems, Principles for Web operation, Goals of the Internet information system and, The Digital Economy and Entrepreneurship, The Rise of Technological Development and the Digital Economy, Digital Payment Systems: Netting Systems, RTGS system, Fedwire, TARGET, SWIFT (Society for Worldwide Interbank Financial Telecommunications), Security of electronic financial transactions, Standards and protocols for security in transactions, The digital economy in the Republic of North Macedonia.

8.	Professor (s)	Associate proffesor			
9.	Requirements for enrolling the course	None			
10.	Aims of the course (competences): This course presents the foundations of finance with an emphasis on applications vital for corporate managers. During the course will be discussed the major financial decisions made by corporate managers, both within the firm and in their interactions with investors. Furthermore, it will be analyzed the criteria for making investment decisions, valuation of financial assets and liabilities, relationships between risk and return, capital structure choice, valuation of derivative securities, risk management etc. During this course the students will learn what is investing and capital budgeting, i.e. how companies decide where to place their long-term capital assets in order to generate the highest risk-adjusted returns. By using financial accounting tools, a company identifies capital expenditures, estimates cash flows from proposed capital projects, compares planned investments with projected income, and decides which projects to include in the capital budget. Also, the aim of the course is to explain what is capital financing, as a main activity with which companies make decisions on how to optimally finance the capital investments through the business' equity, debt, or a mix of both. At the end it will be explained what is return of capital and dividend policy. This activity requires corporate managers to decide whether to retain a business's excess earnings for future investments and operational requirements or to distribute the earnings to shareholders in the form of dividends or share buybacks.				
11.	Contents of the course: Introduction to the Fundamental Concepts of Corporate Finance and Financial Statements Analysis of Financial Statements Time Value of Money Bonds & Interest Rates Risk/Return Tradeoff and CAPM Stock Valuation Capital Budgeting & Evaluating Cash Flows Cost of Capital				

12.	Methods of learning: lectures, exercises, consultations

9.	Requirements for enrolling the course	Financial Accounting
10.	Aims of the course (competences): This course covers the study of the basics, methods and techniques, as well as the use of the results of the analysis of financial statements in the process of making business and investment decisions. It focuses primarily on the financial indicators used by analysts, investors, managers and other interested entities (stakeholders) in evaluating the financial condition, operational performance and cash flows of companies. The purpose of this scientific discipline is to get acquainted with the analysis of financial reports of companies, its general and special goals, as well as the methods used to achieve the set goals. The groups of users of financial statements and their basic interests are studied. Different aspects of the companies' operations are studied in particular, through the calculation and analysis of financial indicators for liquidity, profitability, efficiency, financial structure (indebtedness) and market value. The obtained results from the analysis of financial statements are used as a basis for making efficient business decisions by all stakeholders. Limiting factors in the application of financial indicators are also analyzed. As part of the teaching, a specific analysis of selected companies is carried out, for the purpose of practical illustration of the application of financial indicators in the analysis of the performance of their operations.	
11.	Contents of the course: Introduction to the analysis of financial statements (definition, subject, objectives and tasks); Basic and additional methods of analysis; Data sources for financial analysis and analytical examination preparation; Specific analysis of basic financial statements; Other sources of information for financial analysis; Users of the analysis results; Relationship between financial statement analysis and business analysis; Analysis of the company's competitiveness and bargaining power; Material assumptions for financial analysis (professional regulation, principles, policies); Analysis of current assets (cash and cash equivalents, receivables, inventories); Analysis of fixed assets and financial instruments; Analysis of liabilities and shareholders capital; Methods of financial analysis (horizontal, vertical, financial indicators); Analysis of liquidity and business activity of companies;	

	Analysis of profitability, indebtedness and market value; Limitation factors in the application of financial indicators; Analysis of the Cash Flow Statement (Cash flow analysis); Risk analysis (operational, financial and combined).			
12.	Methods of learning: lectures, exercises, consultations
